

International Bomb Disposal and Counter IED Organization

Sydney Australia Advanced Threat Detection Training Course

Location: Sydney Australia Hayatt Hotel Darling Harbor

Dates: September 6-9, 2026

Cost: \$575.00 Per student

Advanced Threat Detection Training Course Topics:

Two full days of advanced threat detection training covering the following topics:

- 1. IED Concealment Techniques and Detection**
- 2. Threat Imaging Projection (TIP) Loading Threats and updating libraries**
- 3. Advanced Explosive Trace Detection (inorganic detection options)**
- 4. Penetration Testing (The right way)**
- 5. Artificial Intelligence Ai X-Ray Detection**
- 6. CT X-Ray Image Interpretation**
- 7. Detecting Inorganic Explosives**
- 8. Advanced IED circuit component Detection**

International Bomb Disposal and Counter IED Organization

9. Computer Based Training (CBT training development)

10. Full Body Screening and IED Detection

This training course is designed to provide security managers with advanced level training on IED threat detection. The courses will cover significantly more than OEM level operator training and provide realistic methods for improving detection by having a more in-depth understanding of the equipment. The courses will also cover capabilities and limitations of current screening technologies and ways to mitigate these limitations.
